

Parents as Teachers Salary Schedule

On July 14, 2022, an Administrative Memo from the Office of Childhood was disseminated to all school districts. This memo provided the FY 2023 Missouri PAT appropriation and allocation information. Both Parent Education allocations and Developmental Screening allocations were increased to assist school districts in serving eligible children in their districts.

As a result of this additional funding and to continue our efforts in the area of recruitment and retention of highly qualified staff, we have updated the Parents as Teachers Salary Schedule and implemented an increase of 5% to all areas of service with the exception of professional development, which remained unchanged.

The Administration asks that the Board approve the updated PAT Salary Schedule with an effective date of July 1, 2022.
